

I/O Multiplexing Functions

Use `poll()` for portability and simplicity.

- `select()`
 - $O(n)$
 - Max FDs: 1024 (default)
 - Performance: Poor for many FDs
 - Portable, simple
- `poll()`
 - $O(n)$
 - Max FDs: Unlimited
 - Performance: Better than `select()`
 - Recommended
- `epoll()`
 - $O(1)$
 - Max FDs: Unlimited
 - Performance: Excellent
 - Linux only
- `kqueue()`

- $O(1)$
- Max FDs: Unlimited
- Performance: Excellent
- MacOS/BSD only
