

List of Web Servers

Classification of Web Servers

Type	What it does	Examples
Static/Reverse Proxy	Serves static files, load balancing, caching, SSL termination	NGINX, Apache HTTPD, Lighttpd
Application Server	Executes dynamic code (Java, Python, PHP, etc.)	Tomcat, Gunicorn, uWSGI, PHP-FPM
Full-Featured	Both static serving and application execution	Apache HTTPD (with modules), NGINX (with modules), IIS
Embedded	Server inside another application	Jetty, Tomcat Embedded, Mongoose
